

Simultaneous Equations – The Basics

Solve the simultaneous equations below.

Question 1. 7 eggs and 8 fish cost £74 6 eggs and 8 fish cost £68 How much does each cost?	Question 2. 9 goats and 1 hens cost £24 2 goats and 1 hens cost £10 How much does each cost?
Question 3. $3x + y = 10$ $8x - y = 1$	Question 4. $5x - 4y = 36$ $2x - 4y = 6$

Simultaneous Equations – The Basics

Solve the simultaneous equations below.

Question 1. 7 eggs and 8 fish cost £74 6 eggs and 8 fish cost £68 How much does each cost?	Question 2. 9 goats and 1 hens cost £24 2 goats and 1 hens cost £10 How much does each cost?
Question 3. $3x + y = 10$ $8x - y = 1$	Question 4. $5x - 4y = 36$ $2x - 4y = 6$
